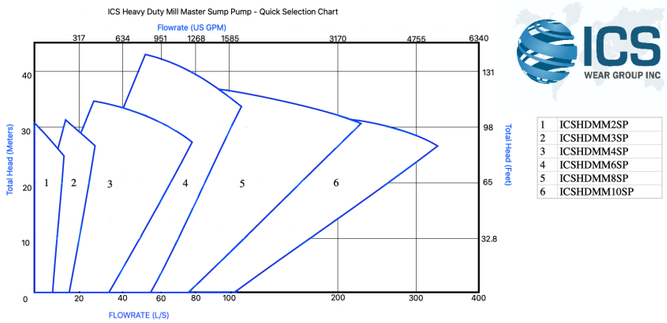
ICS MILL MASTER SUMP PUMPS

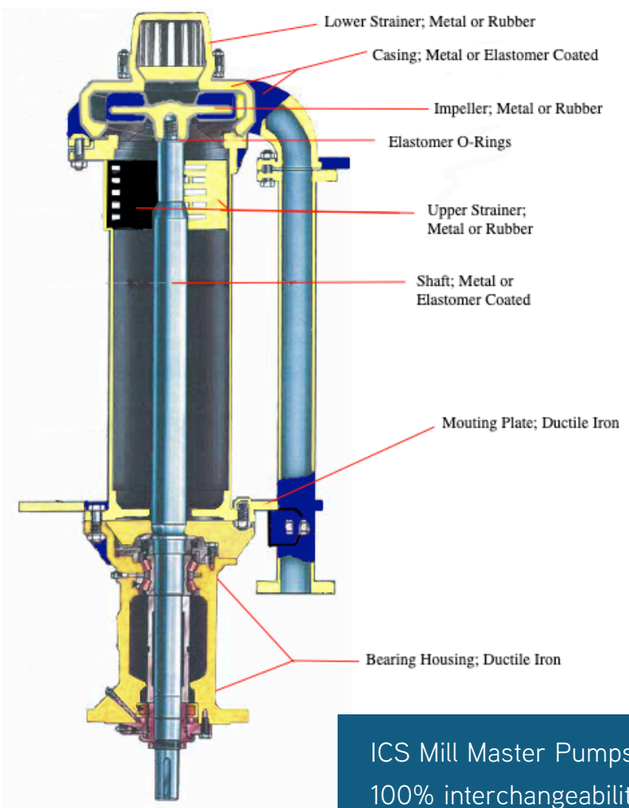
The Heavy-Duty ICS Mill Master Pump line provides you the opportunity to build your pump – a pump specifically designed to meet your site-specific application.

The ICS Heavy Duty Mill Master Sump Pump Line

are sized from 2 to 10 allowing them to suit the majority of pumping applications. ICS Mill Master sump pumps are proving themselves around the globe in:

- Mineral processing;
- Coal preparation;
- Chemical processing;
- Waste and Tailings management;
- And any open hole or tank application.





ICS Mill Master Sump Pumps are available in a selection of standard lengths to suit common sump depths. ICS sump pumps can be custom fitted with extensions of up to two meters.

The ICS Sump Pump was designed to handle various slurries in mind, with wet end components available in a selection of materials such as high chrome percentages from 28 - 36, CD4M and various elastomers. This section makes our pumps perfect for:

- Abrasive / corrosive slurries;
- Various particle sizes;
- High Density slurries;
- Continuous operations.

ICS Mill Master Pumps provide 100% interchangeability.

Meeting International Standards

of ISO 9001:2015 ICS Wear Group works hard every day to maintain this standard. Safety is key at all ICS Wear Group facilities from the office to the warehouse, everyone looks out for each other by completing job hazard assessments every day. Our newest location in Nanaimo BC, just surpassed 2000 hours LTI Free.

At ICS Wear Group we aim to be your single source supplier through these 3-key metrics:

- Provide reliable high-quality products;
- Provide lower total cost;
- Provide higher quality customer service experience.
