ICS WEAR GROUP LINERS

*The Mill is the center of the production process.
ICS Mill Liners are fabricated to the same strict specifications and
standards, guaranteeing compatibility for trouble-free operation.*

ICS Wear Group can cast all of your mill liner needs with average savings of 30% compared to that of the OEM's. Savings are not the only benefit; local Canadian manufacturing that's offering to stock your max / mins in our state-of-the-art warehouse, we offer customizations to liners to promote safer working conditions, decreased down time for enhanced profitability and a proven logistics team allowing for quick deliveries if required.

ICS can handle almost any request; our facility has the capacity to deal with components ranging in size from one pound to 8,000 pounds and can work with a variety of alloys:

1. High Chrome White Iron from 10 – 38%
2. Chrome Moly Steels 2-7%
3. Ni-Hard
4. Work Hardening Proprietary alloys designed to harden with impact
5. Rubber liners with metal inserts including segment rings

Available castings include Mill Liners, Chute Liners, Loaf Liners, Rim Liners, Feeder Pans, Grizzly Bars as well as all Liners Where additional wear protection is required. To ensure you get the maximum life out of your mill and maximize your processing efficiency, contact ICS Wear Group for your site-specific requirements (Ball Mill, Rod Mill and SAG Mill).
